

The HTML Strategy

The Harmony Trust have developed a 'Harnessing Technology Maximising Learning' (HTML) Strategy which is a cross-cutting plan which aims to maximise the use of technology to enhance and support learning across the whole organisation; for our children, their parents and their teachers.

The HTML Strategy is ambitious in its aim; to significantly increase the use of technology across all academies so that children and staff use it wisely to enhance their learning.

At Reigate, all children across years 3 - 5 have been issued an iPad to support their learning at school and at home. Pupils are responsible for keeping their iPads safe and bringing them to class, fully charged, each day.

All children in Early Years and Key Stage 1 are also benefitting from having significantly increased access to iPads and other technology in school, to maximise their learning onsite. This will be done through a mixture of Purple Mash and National Online Safety.

As part of the 1-1 iPad launch, all pupils must complete the Harmony iPad Induction before they are allowed to take their iPad off site (Years 3-6). The iPad induction is a rigorous, 5-stage induction package designed to equip students to be workwise, efficient and safe digital learners. Here is an outline of what is covered in the iPad induction:

Lesson 1 - How to setup my iPad...

Lesson 2 - How to use my iPad...

Lesson 3 - Keeping my iPad safe...

Lesson 4 - Keeping myself safe online...

Lesson 5 - Where can my iPad take me?

Pupil and Parental Agreements

As our iPads are leased, we are required to receive signed documentation from pupils and their parents/carers, accepting the terms and conditions and acceptable use of Harmony iPads. These documents will be sent home as a paper copy, to be returned to your child's class teacher.

Promoting Online Safety at Home

Equipping children to be responsible and safe in the digital world is an important, on-going commitment. It is important that children hear online safety messages in school and at home, in order for the key messages to really sink in. At Reigate, as part of our mission to

promote online safety amongst our children we have invested in National Online Safety to guide our E-Safety practice for staff and students. We are delighted to be in a position to offer free access to the full range of Online Safety materials to support parents/carers with a huge range of topics. Please follow the link below to register your free parent/ carers account. This will provide you with free resources, courses and information to help you keep your children safe when using devices at home.
